

# THE THRACIAN

WHERE NFT'S AND HISTORY COLLIDE

# INTRODUCTION

Thracian NFT is a collection of historic epic heroes brought to life through blockchain technology. These unique NFTs will be available for use within the Blockchain Valley Virtual Metaverse, and will be minted by Crypto.com, the leading marketplace for

NFTs. The Thracian NFT collection is a celebration of the rich history of the Thracian people, who inhabited parts of Eastern and Southeastern Europe in ancient history.

## WHO WERE THE THRACIAN PEOPLE?

The Thracians gained notoriety for their fierce opposition to invasion. The Greeks and Romans may have characterized the Thracians as “warlike,” but their conquerors quickly learned that the Thracians were a proud and independent people who were

committed to preserving their own culture and customs. Culture among the Thracians was highly regarded; they were particularly renowned for their poetry and music.

## THRACIAN LORE

The Thracians were an Indo-European-speaking people who lived in southern Europe. One theory suggests they were the original inhabitants of the region, while another suggests they have connections to tribes in West Asia. Yet another theory proposes that they evolved from the interbreeding of indigenous peoples in southeastern Europe and migrant tribes from Asia.

Influencing both Greek and Roman cultures, the Thracians left an indelible mark on the evolution of European society. The Greeks and Romans may have borrowed heavily from Thracian religious practices and legend.

The Thracians were renowned for their military prowess and were frequently hired out as soldiers. Strong Trojan warriors were portrayed by Homer in "The Iliad." Herodotus said the Thracians and Indians were the two most populous peoples and that the Thracians would be unstoppable as a unified force if only they could stop warring. For nearly five centuries before being overrun by the Roman Empire in 46 AD, the Thracians had tried to establish a state known as the Odrysian Kingdom.

The Thracians were renowned for their prowess in battle, their ability to craft beautiful jewelry and ornamentation, and their alcohol. Warfare among the Thracians was frequent because of their ability and ferocity as warriors. Multiple impressive golden treasures of Thracian origin have been found in Bulgaria, attesting to the fact that the Thracians were also known for creating fine jewelry and ornamentation. Some theories that support the notion of the Thracians being the original inhabitants of this land point to the Thracians as the creators of the oldest golden treasure in the world discovered in northeastern Bulgaria near the city of Varna and dating back to 6000 years BC. (Varna Necropolis)

The Thracians' wine, however, is what truly established them as a world-renowned viticulture culture. Wine played an important role in numerous ceremonies practiced by the ancient Thracians. Some

of the most significant rites and cults practiced by the Thracians were influenced by Zagreus, the God of Wine (also known as Dionysus by the Greeks and Bacchus by the Romans).

There may be disagreements about the Thracians' beginnings and ultimate destiny, but there's no denying that their legacy lives on in the present-day culture of Bulgaria and the rest of the Balkans.

# FEATURES AND BENEFITS OF THRACIAN NFTS

Owners of a Thracian NFT will have access to the Thracian Village within the Blockchain Valley Virtual Metaverse, where they can participate in historically accurate Thracian games and interact with other NFT owners. Some of the perks of owning a Thracian NFT include:

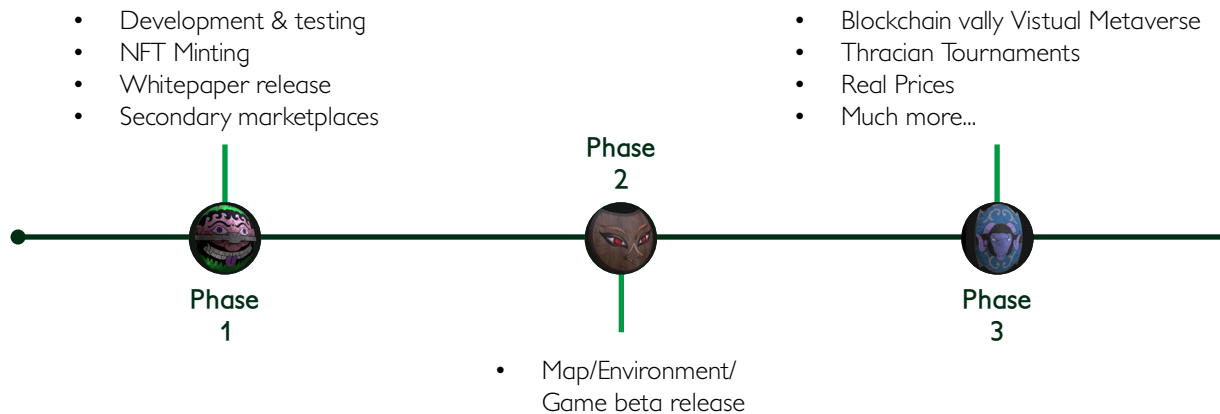

- Limited edition The Valley Founders badge
- Recurring special NFT drops (clothes, accessories, items, etc.)
- Access to the Thracian Village in Blockchain Valley Virtual Metaverse
- Access to exclusive events
- Discounts on virtual assets
- More superpowers added over time
- Win real prizes

## DESIGN AND TRAIT DISTRIBUTION

The design details of the Thracian NFT collection have been meticulously researched to ensure historical accuracy. Each NFT will feature traditional Thracian weapons and accessories, including the Shield, Sica, Polearm, Phrygian Helmet, and Zeira. The NFT collection will have a limited distribution, with 5 different types of Shields and 25 variations, 3 different types of Swords and 9 variations, 3 different types of Helmets and 9 variations, 3 different types of Bases and 9 variations, and 5 different types of Suit Accessories and 25 variations.

# DEVELOPMENT ROADMAP

Each NFT holder will be granted exclusive access into the Thracian Village within the Blockchain Valley Virtual Metaverse, the site of many traditional games that were authentic to the time period in which the Thracian warriors lived.

## TEAM AND PARTNERSHIPS

Blockchain Valley Virtual is led by an international team of skillful and passionate professionals with a dedication to the job at hand. Each member brings a unique set of expertise and talents from the domains of software development, 3D modeling, gaming, project management, marketing, and decentralized finances, united by a shared vision. Their collective

knowledge, dedication, and industry experience constitute a solid promise for realizing the full scope of Blockchain Valley Virtual.

Committed to achieving the best possible results, the BVV Team will go above and beyond to meet their users' expectations.

# BLOCKCHAIN VALLEY VIRTUAL MISSION, VISION, AND VALUES

## Mission

Our mission is to provide a metaverse platform with a state-of-the-art, fully immersive virtual 3D world, empowering people to experience and achieve more.

## Vision

In the near future, we envision BVV as the most frequented mixed reality platform in the world. We want to provide regular people plenty of reasons to spend time in it. We will enable entrepreneurs to grow and evolve their businesses.

## Values

Our promise to each other and to our Customers and Investors:  
Trust, Creativity, Service, Freedom, and Gratitude.

## PRICE AND AVAILABILITY

The Thracian NFTs will be available for purchase starting at \$499 each. With a limited distribution, this is an opportunity for collectors and history enthusiasts to own a piece of Thracian culture and be a part of the growing NFT community.

## CONCLUSION

Thracian NFT is a unique and exciting NFT collection that celebrates the rich history of the Thracian people. With its historical accuracy and exclusive benefits, owning a Thracian NFT is a once-in-a-lifetime opportunity for collectors and history enthusiasts alike. Join the growing community of NFT owners and become a part of the future of blockchain, gaming, and virtual reality metaverse technology.
